EDUCATION

The University of Texas at Austin, Austin, TX — Dec 2027
Master of Science in Computer Science
Relevant Coursework: Machine Learning, Advances in Deep Learning, Advanced Linear Algebra, Parallel Systems

Texas A&M University, College Station, TX — Aug 2019 - May 2023
Bachelor of Science in Computer Engineering, Minor in Mathematics
Relevant Coursework: Software Engineering, Cryptography 1 & 2, Discrete Mathematics

SKILLS

Programming Languages: Python, Java, Go, SQL, C++, JavaScript, HTML/CSS, Rust, C
Technologies & Frameworks: AWS (Lambda, EC2, IAM, ACM, Secrets Manager, Quicksight), Claude Code, Docker, REST APIs, CI/CD, Agile, Machine Learning
Tools: Postman, Hoppscotch, Insomnia, Jira, Git
Certifications: AWS Certified Solutions Architect - Associate, Alteryx Certification

EXPERIENCE

CAPITAL ONE, Plano, TX — Feb 2025 - Present
Full-stack Engineer, Cyber - Crypto Services

- Engineered an AWS QuickSight dashboard to monitor daily inventory and expiration timelines for 20,000+ certificates, enhancing visibility and preventing potential system outages.
- Automated third-party user provisioning by integrating internal REST APIs for entitlement management, eliminating manual bottlenecks for cross-functional teams.
- Leveraged AI-assisted development to build a Claude skill that automates application migrations onto the certificate management service, accelerating onboarding and resolving customer support inquiries.
- Integrated Sectigo as a secondary Certificate Authority, ensuring high availability and system redundancy while strictly adhering to internal enterprise security standards.
- Managed robust data pipelines using AWS Lambda to ingest, transform, and publish multi-API certificate data into a central data lake for advanced Snowflake querying.

CAPITAL ONE, Plano, TX — Feb 2024 - Feb 2025
Full-stack Engineer, Financial Services Tech - Dealer Risk

- Spearheaded the migration of 75,000+ contracts from legacy storage to a modernized internal platform, engineering new Salesforce API integrations to ensure zero data loss.
- Accelerated a major business initiative to integrate 1,600 dealerships into the auto loan program by automating manual onboarding workflows using Playwright.
- Maintained high availability and resolved critical system incidents for the Dealer Customer Information System (DCIS) API, a core microservice driving the company's auto financing operations.

GOLDMAN SACHS, Dallas, TX — Jun 2022 - Aug 2022
Engineering Summer Analyst, Global Markets Tech Risk

- Automated the daily risk reporting workflow using Alteryx to query, analyze, and distribute metrics via email, reducing turnaround time from over 2 hours to less than 3 minutes.
- Achieved Alteryx Certification within one week of internship, significantly outpacing the standard six-month timeline for full-time employees.
